

## DEEDSCANNER™

DeedScanner is a value-added product, used in conjunction with our Deeds application.

The product enables lodging agents to electronically communicate progress updates on transactions in the Deeds Office. DeedScanner is downloaded onto a Smartphone, IOS or Android. The process of receiving and submitting progress updates on transactions is done in a matter of seconds using the barcode supplied by the Deeds Office.

The introduction of this product will assist attorneys in keeping clients updated in a far more accurate and efficient timeframe.

### How does it work?

In simple terms, the user will electronically scan using the Smartphone device camera or manually enter a Deeds Office barcode to retrieve the e4 application details. The app will display a summary view of the transaction details linked to that barcode and this instantaneously gives users the ability to submit a status update on single or multiple transactions. These status changes will be updated immediately and sent to the relevant attorney or correspondent office via Deeds. DeedScanner has further utilised the device technology to enable the user to take photos of the file or the rejection notes. These images are uploaded to the e4 transaction and shared via e-mail integrated platforms. Being able to do this, will provide the attorney with the ability to immediately report and communicate minor issues or rejection notes pertaining to transactions.

### Benefits:

- Electronic-based communication for Deeds Office matters
- Electronically communicate progress updates from your device
- Users have the ability to submit status updates on single or multiple transactions
- Status changes made reflect immediately
- Send a photograph of the lodgment file or rejection notes to Deeds
- Update the Deeds Office fee related to the transaction in Deeds
- Parties are notified electronically in Deeds and via e-mail
- Available for free on IOS and Android stores
